

 **KÄRCHER®**

**Kärcher New Zealand-are our sole supplier of water-blasting equipment.**

From the outset we have used Kärcher cleaners, and have found them highly efficient and effective in terms of water-usage. Kärcher's patented superior nozzle design provides faster and more effective cleaning- and can save up to 50% in terms of energy, water, and time!

Kärcher is also globally committed to sustainable practice, and is leading the way in Photovoltaic Solar and Geothermal Energy development in Europe.

Given Kärcher's commitment to sustainability, we are proud to be not only enacting our Clean Advertising campaigns with Kärcher technology; but to be partnered with such an environmentally ethical company.
